

Truck Delivery Number Recognition

What You Need:

- 45 blocks or Duplo Legos
- 9 sheets of foam printed with numerals 1 to 9*
- Toy truck
- Marker

*

What You Do:

- Create a number line of foam sheets*.
- Place 45 blocks on the floor or in a container.
- Model this activity** (Your child may only need you to model one or two numbers).
- Use the truck to move the blocks from the pile onto the foam sheets, placing the correct number of blocks on each sheet.

(Note: In the picture the child is viewing the number line from an angle that misrepresent the numbers' formation and order. It would be better to coach the child to drive his truck up the other side.)

Variations:

- Use other forms of numbers like the ones shown in the picture.
- Take it outside. Create the number line in the dirt or have your child help you create it out of pebbles.

Next Steps:

- Let your child help create the number line.

* Darice 30003709 Foamies Foam Sheets Value Pack - Assorted Colors - 4.5 x 6 inches - 100 pieces (Amazon for \$9.39)

**Gentle Reminder: Modeling involves three steps.

1. I do it.
2. We do it.
3. You do it.
